League InfoSight Highlights

have you heard?

INFO SIGHT 360

**will be available in
the 1st Quarter 2025!
Stay tuned for launch details!**

InfoSight360 is a groundbreaking integration of our flagship products - InfoSight, CU PolicyPro, and RecoveryPro, combining the best elements of these industry-leading tools into one seamless solution. Credit unions subscribed to any of our three products will be automatically upgraded to the new platform.

The content of all three products will be integrated under a single sign-on, eliminating the need to toggle between different systems and ensuring that no critical information is overlooked. When users access a particular product, the system will automatically present related content from across the platform, providing a comprehensive overview and allowing credit unions to leverage all available information.

With new features such as an enhanced artificial intelligent search, state-specific content comparison, and customizable dashboards, InfoSight360 promises to redefine your compliance experience.

InfoSight360 is launching in Q1 2025. Stay tuned for launch details!

InfoSight360 FAQs

Why are the products being combined?

While all three products serve a unique purpose, the information in each complements the others and topics often overlap. The new system will allow for better integration of our products along with a single sign-on, bringing compliance information, operational tools, resources, and your credit union's own policies, procedures, and business continuity plan all in one place!

What if my credit union does not subscribe to all three products?

All credit unions will be upgraded to the new platform regardless of which products they currently subscribe to or utilize.

If you are utilizing only one or two of the products in the platform, you will still be able to see the potential resources available from all products. Credit unions will also receive the benefit of all three systems in the artificial intelligence (AI) search feature that will now be one of the main components of the new system. For example, even if the credit union does not subscribe to RecoveryPro but asks a question about business continuity planning or a business process, the response that is generated will pull from the content in RecoveryPro to provide a response.

Watch for additional FAQs in upcoming issues of the newsletter. We look forward to sharing more details in the coming weeks.
